5 Gallon Bottle Cap Pre-heater

Overview

It is used before the 5 gallons recycle bottle de-capping to make the de-capping more easily. After its coming to the market, the product enjoys the popularity among the bottle water factories. It is a special auxiliary equipment for bottle cap decapper. The machine adopts PLC control. It can automatically stop or work.

Electric system

The electric part consists of AC contactor, fuse and Air Switch.

Technical Parameters

items	specification
Production capacity	300-600bottles/h
Bottle spec	φ270×490×φ56
Power consumption of the heat generating tube	0.8KW(five tubes)
Conveying motor power	0 . 37KW
power voltage	AC 380V±5% <input checked="" type="checkbox"/> 50HZ <input checked="" type="checkbox"/> 60HZ
	AC 220V±5% 50HZ 60HZ
rated current	15A <input checked="" type="checkbox"/> 24A
Net weight	30Kg
External size	760×370×730(mm)
