### 5 Gallon Inner and Outer Brush Pre-washer

#### Overview

Drum production line is designed for 5-6 gallons of bottled drinking water production with a series of equipment. The production line can automatically complete the barrel, cleaning, disinfection and delivery of the barrel, with full-featured, compact structure, simple operation, is set machine, electricity, gas in one of the new drinking water bottled equipment

#### Work Principle

The machine is a continuous bottle washing machine which is used with a conveying machine. When it works, the brush runs continuously, the water pump continuously sprays, the empty drums are carried to the drum-conveying work position. The washing work position has three processes that is each drum is brushed and washed three times to ensure its washing result. The conveying drum device has governing device to make the washing time to be adjusted at will.

#### Technical Parameters

- Input Voltage:380V
- Total power:1.5KW
- Appearance Size:1700×900×1600
- Suitable Drum shape:ϕ270×490×ϕ56
- Production Capacity:400 ~ 600 drums/hr
- Washing Method: Continuous Washing
