

Customization & Professionalization

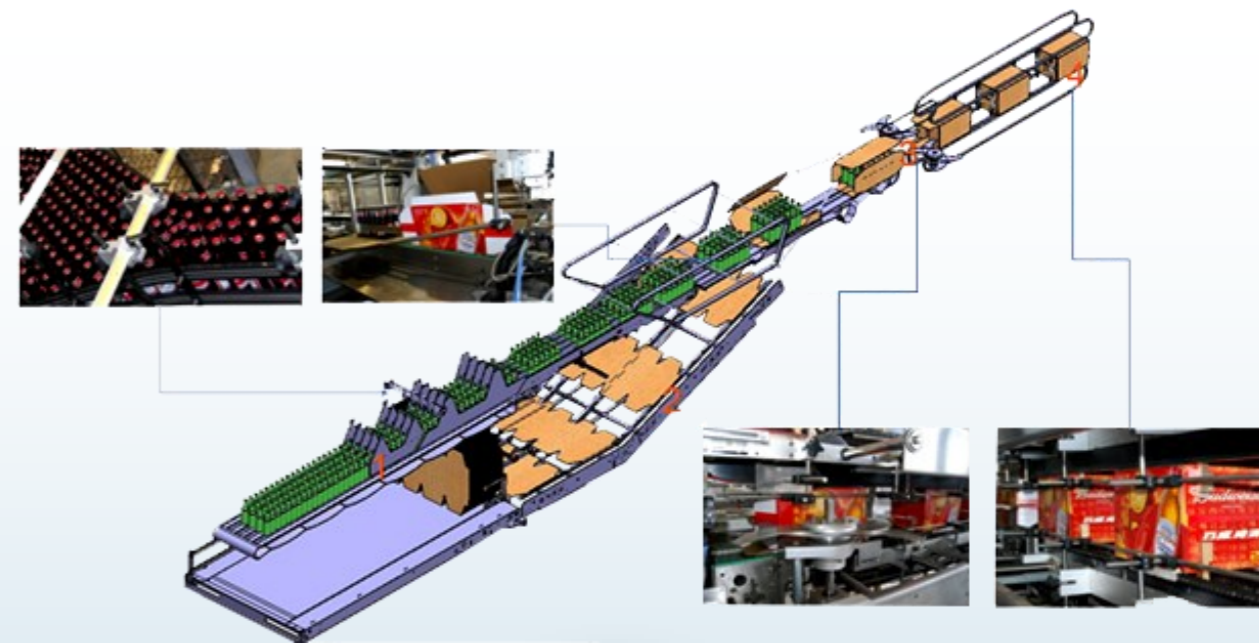

Case Round Wrapping Packer

Application

Case round wrapping packer is a piece of packaging equipment which automatically packed products into cases from a flat cardboard and some bottles. It can pack containers in different materials such as PET bottles or glass bottles, and different shapes such as round, square, oval, triangle etc. It is a full automatic machine to pack bottles, cans and jars into cartons. It keeps stability in continuous linear operation and fits medium and high speed production line.

Running Principle
